

# TV REMOTE CONTROL SAVES LIVES AND MONEY FOR HEALTHCARE

**IMA**  
Independent Medical Associates

## SAVE LIVES

HELP REDUCE NOSOCOMIAL INFECTIONS

### Problem

- TV Remote controls are one of the most often touched objects in a patients room.
- Remote controls are one of the most contaminated surfaces in a patients room. Remotes have often been tested to carry MRSA and other dangerous bacteria.
- Standard TV remotes are impossible to clean properly due to crevices and openings.

### Solution - Clean Remote

- Clean Remote flat non-porous surface resists bacteria growth
- Clinically tested to carry 99% less bacteria than all other remotes tested.
- Also protect your staff and visitors who often touch the TV remote.

## SAVE MONEY

- **SPILLPROOF** – Do not have to replace Remote Control every time someone spills liquid or food on remote.
- **Attached Battery Door** – Save money not needing to replace often lost battery door
- **HIDDEN Batteries** – Prevents costly replacement of stolen batteries by patients and visitors for personal electronics.
- **No Codes or reprogramming ever.** Simple One-Touch setup & remote is programmed for life.
- **Works over 250 brands of TV's** –no need for different remotes Clean Remote works them all.
- **Only staff can reprogram remote if needed.**

Uses 2 AAA Batteries
