

Peripherally Inserted Central Catheter with Peel-Away Introducer Sheath

The Footprint™ introducer sheath has unique design features to enhance first stick success.

The hub is clearly marked with "PICC" and French size to readily identify catheter type.

Peripherally Inserted Central Catheter

- Designed especially for neonatal/pediatric patients
- Silicone catheter with integrated extension set
- Soft stabilization wing for enhanced securement
- Indelible markings every centimeter
- Fully radiopaque
- Latex and DEHP free

Introducer Sheath

- Notched needle with minimal lie distance for immediate visualization of flashback designed to increase first stick success
- Low profile, compact introducer designed to enhance small vein access
