The Landmarks handbook concisely presents landmarks, anatomical principles and tips on technique for commonly performed peripheral nerve blocks. Quick-reference tabs facilitate rapid access to information about each block. Rugged construction with water-repellent pages and small size allows the book to be easily carried in the pocket and makes it ideal for clinical use.

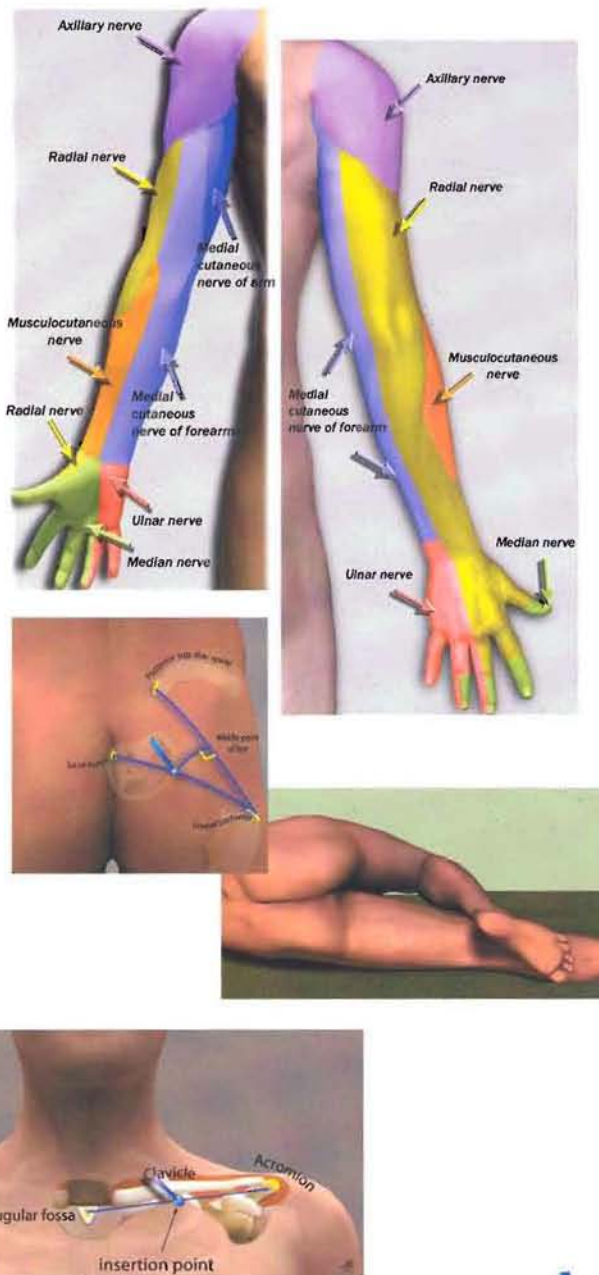

• Ideal for clinical use

• Easily carried in the pocket

• **Liberal**ly illustrated

CONTENTS

Principles of Neurostimulation
Definitions

Upper Extremity Landmarks

- Brachial Plexus Block
- Interscalene
- Supraclavicular
- Infraclavicular
- Axillary
- Humeral Canal
- Blocks at the Elbow
- Blocks at the Wrist
- Complementary Block
- Flexor Digitorum Sheath Block

Lower Extremity Landmarks

- Sciatic Nerve Blocks
- Proximal Posterior Approach
- Parasacral
- Classic Posterior
- Lithotomic
- Sub-Gluteal
- Proximal Lateral Approach
- Proximal Anterior Approach
- Distal Approach
- Lateral Popliteal
- High Popliteal
- Classic Posterior Popliteal
- Lumbar Nerve Blocks
- Posterior Approach (Lumbar)
- Anterior Approach (Femoral)
- Ilio-Fascial Block
- Complimentary Blocks
- Obturator Nerve Block
- Saphenous Nerve Block
- Ankle Block
