5-0237-93	Medium Handle	145mm	2 "C"	1
5-0237-96	Micro Handle	80mm	Lithium 123	1

Stainless Steel Howland Lock

- Natural lifting simplifies laryngeal exposure, making intubation possible even in the most difficult cases
- Built-in leverage decreases prying and reduces possibility of broken teeth
- Compatible with all hook-on conventional laryngoscope handles and blades
- Can often make an otherwise certain tracheotomy unnecessary

Cat#	Description	Box
5-0236-00	Conventional Howland Lock	1

Highest Quality. Unequalled Value. Outstanding Service.

Conventional Laryngoscopes
Disposable LED Blades

SunMed's conventional stainless steel disposable blades answer the professional's request for a non-plastic disposable blade. These blades emit a clean, cool white LED light, and their low power use ensures a long battery life. The patented safety heel inhibits the blade tip from contacting handle. All sizes are compatible with Conventional ISO System handles. Using disposable blades helps reduce costs and concerns typically associated with reusable blades. These disposable blades are single use, sterile and individually packaged.
