0152	7' Kink Resistant Tubing	.25
0153	7' Kink Resistant Tubing and Threaded Nut	.25
0157	7' Kink Resistant Tubing	.50

With the patient's ease of fit and maximum comfort in mind, the ComfortPlus line of Cannulas are designed lightweight and clear to ensure a comfortable fit for long-term use. The Over-the-Ear, "Bolo-Style" adjustable slide moves smoothly, yet provides a secure and comfortable fit while allowing maximum freedom of movement. The curved nasal prongs enhance and promote alignment of the cannula to fit naturally on the patient's face, eliminating the irritating flap required with conventional style cannulas. The Comfort Plus Soft Tip Line of Cannulas comes standard with "six-channel" safety tubing to ensure uninterrupted flow of oxygen to the patient. Also available in special lengths, please contact a Westmed representative for details.

Comfort Plus™ and EarMates™ are Trademarks of Westmed, Inc.

EarMates™ are soft foam tubes designed to prevent ear chafing.

Product Number	Description	Case Qty

A safe and simple alternative for oxygen therapy patients.

The BiFlo™ & PediFlo™ features and benefits:

- The BiFlo nasal mask is a simple and comfortable device designed as an alternative for oxygen therapy patients who cannot or will not tolerate a cannula or for those patients who have recurring necrosis.
- PaO2 and FIO2 values are comparable to those receiving oxygen with a conventional nasal cannula.
- The BiFlo delivers a gentle flow of oxygen. Unlike a nasal cannula, oxygen flow is not jetted into the nasal cavity.
- The PediFlo animated design reduces the apprehension generally encountered by younger patients.
- Latex Free.

PediFlo Nasal Mask, Pediatric (Animated)
