

A Size for Every Situation

Catheter & Line Securement  
for securing all types of lines, tubes and catheters

Safe. Simple.  
Secure. Versatile.

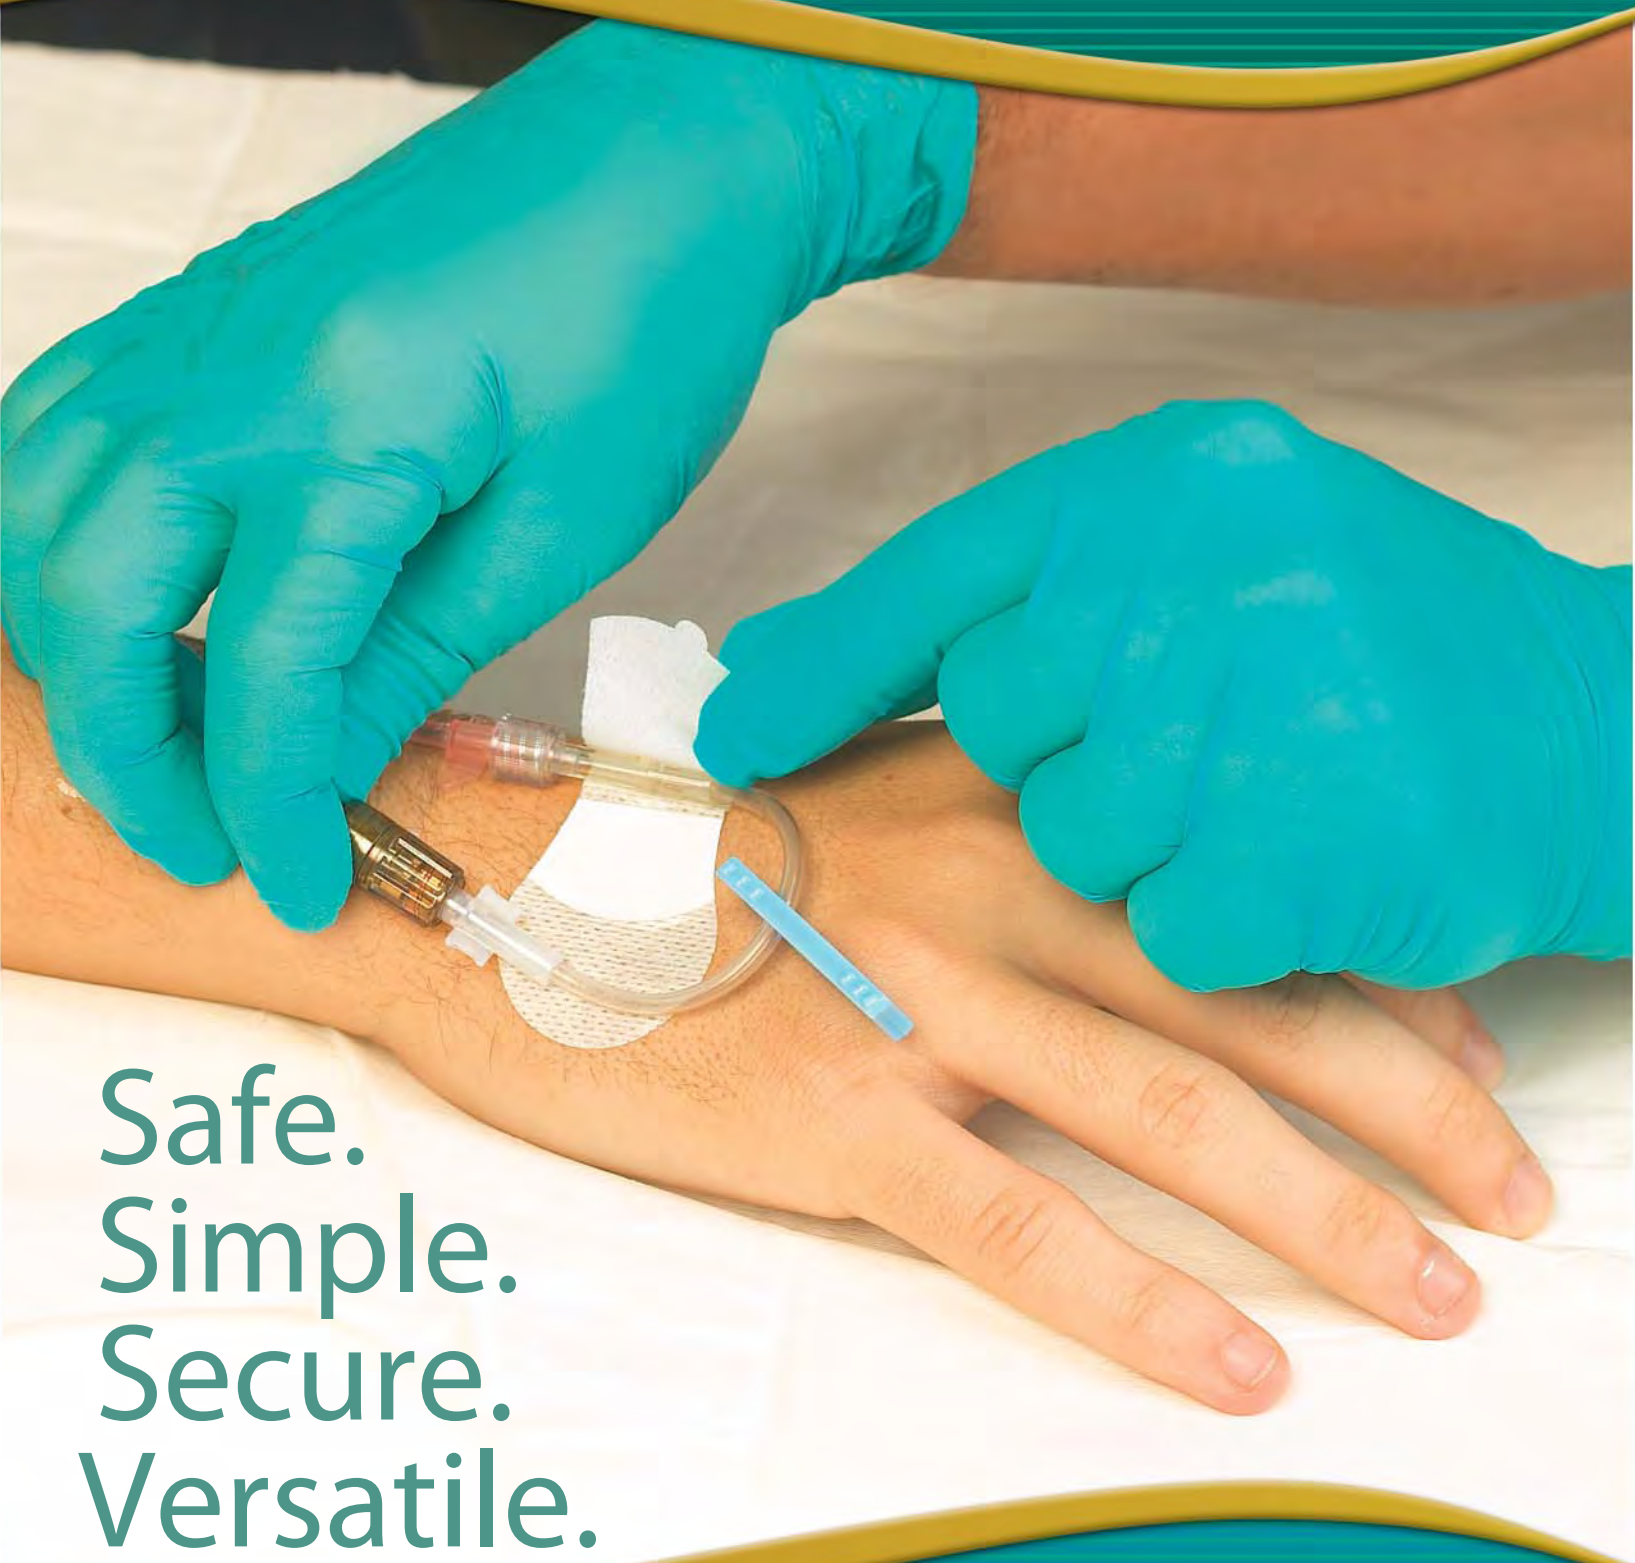

ORDERING INFORMATION

Grip-Lok Universal Securement Devices					
PRODUCT #	DES CRIP TION	APPLICATION	TUBING RANGE	DEVICE LENGTH	U/M
3200S	Small Universal*	Small Tube Securement	1/16" - 3/16" (1.5 - 4.5mm)	3" (7.6 cm)	100/bx
3300M	Medium Universal*	Medium Tube Securement	1/8" - 5/16" (3.0 - 8.0mm)	3.5" (8.9 cm)	100/bx
3400L	Large Universal*	Large Tube Securement	1/4" - 1/2" (6.0 - 13.0mm)	6.5" (16.5 cm)	100/bx
3300MWA	Medium Wide Adhesive Universal*	Universal PICC/CVC & Tube Securement	1/4" - 1/2" (6.0 - 13.0mm)	3.5" (8.9 cm)	100/bx

Application Specific Grip-Lok Catheter Securement Devices					
PRODUCT #	DES CRIP TION	APPLICATION	TUBING RANGE	DEVICE LENGTH	U/M
3400LFC	Large Foley Catheter*	Foley Catheter Securement	1/4" - 1/2" (6.0 - 13.0mm)	6.5" (16.5 cm)	100/bx
3300MEPI	Medium Epidural*	Epidural Catheter Securement	1/64" - 5/64" (0.5 - 2.0mm)	3.5" (8.9 cm)	50/bx
3303MCS-TA	Medium for Arrow CVC*	CVC Securement	NA	3.5" (8.9 cm)	50/bx
3301MCS-BD	Medium for BD Arterial Cannula with FloSwitch*	Arterial Cannula Securement	NA	3.5" (8.9 cm)	100/bx
3304MCS-BA	Medium for BARD PICC & CVC*	BARD Catheter Securement	NA	3.5" (8.9 cm)	50/bx
3302MCS-MC	Medium for Medcomp Pro-PICC*	Medcomp Catheter Securement	NA	3.5" (8.9 cm)	50/bx
4200ZAB	Arterial Anchor Bandage*	Arterial Cannula Securement	NA	3" (7.6 cm)	20/bx

Grip-Lok H Hydrocolloid Securement Devices					
PRODUCT #	DES CRIP TION	APPLICATION	TUBING RANGE	DEVICE LENGTH	U/M
3100ESH	Extra Small Hydrocolloid*	Neonatal	1/32" - 1/8" (1.0 - 3.0mm)	2.5" (6.4 cm)	100/bx
3200SH	Small Hydrocolloid*	For Patients with Fragile Skin	1/16" - 3/16" (1.5 - 4.5mm)	3" (7.6 cm)	100/bx
2100NGH	Nasal Gastric Hydrocolloid*	Neonatal Feeding Tube Securement	1/32" - 1/8" (1.0 - 3.0mm)	1.625" (4.1 cm)	100/bx

\* Individually Packaged, Sterile

Safe.  
Simple.  
Secure.  
Versatile.

Safe... Grip-Lok is latex free and packaged sterile, allowing you to use Grip-Lok close to the insertion site or right in the sterile field.

Simple... Grip-Lok is applied in the same simple manner as a bandage and can be easily placed and adjusted with gloved hands.

Secure... Durably engineered, Grip-Lok holds better than tape and helps prevent dislodgement and migration, resulting in reduced risk of lost lines and patient discomfort. Using Grip-Lok for catheter stabilization conforms to the new Infusion Nursing Standards of Practice<sup>1</sup> and can eliminate the need for sutures and unscheduled catheter restarts, thus directly reducing needlestick injuries.<sup>2</sup>

Versatile... many Grip-Lok models can be universally used with a wide range of lines and tubes along with virtually all catheter brands and types.

Manufactured catheter stabilization devices are now listed as “preferred” in the new Infusion Nursing Standards of Practice<sup>1</sup>. Grip-Lok is a stabilization and securement device that is strong enough to lock catheters, tubes and lines securely in place, yet versatile enough for almost any securement situation.

Grip-Lok® utilizes hypoallergenic latex free skin contact adhesives and is available with hydrocolloid adhesive for patients with extra sensitive skin. The hydrocolloid adhesive is recommended for neonates and will break down with water for ease of removal<sup>3</sup>.

**Small**

Grip-Lok Small (**3200S**) universal stabilization device is strong enough to lock lines and tubes 1.5 to 4.5 mm in diameter. The 3200S can be used in a wide variety of applications that require a smaller footprint area such as on infants or children.

**Medium**

Grip-Lok Medium (**3300M**) universal stabilization device is versatile enough for almost any securement situation and is strong enough to securely hold lines and tubes 3 to 8 mm in diameter.

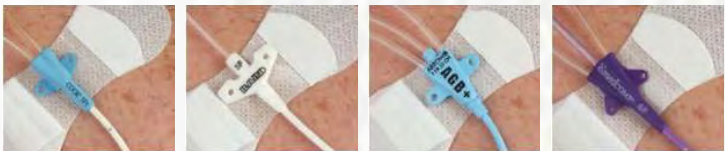

**Large**

Grip-Lok Large (**3400L**) is a universal large line and catheter stabilization device that will hold tubes 6 to 13 mm in diameter securely in place. The 3400L can provide firm securement for chest tubes and provides comfortable securement of a wide range of latex Foley catheter sizes.

**Medium**

**Wide Adhesive**  
Grip-Lok Medium Wide Adhesive (**3300MWA**) will adhere and secure catheters made from silicone, PVC and other plastic compounds. The versatility of the 3300MWA will secure larger tubes in addition to a wide variety of hub sizes and shapes.

**Foley Catheter**

Grip-Lok Large Foley Catheter (**3400LFC**) is designed to secure the catheter in a channel created by a foam insert and a fabric loop overstrap. The 3400LFC does not utilize adhesive to secure the catheter in place allowing for freedom of movement and patient comfort. The degree of rotational and horizontal movement can be adjusted using the top fabric overstraps.

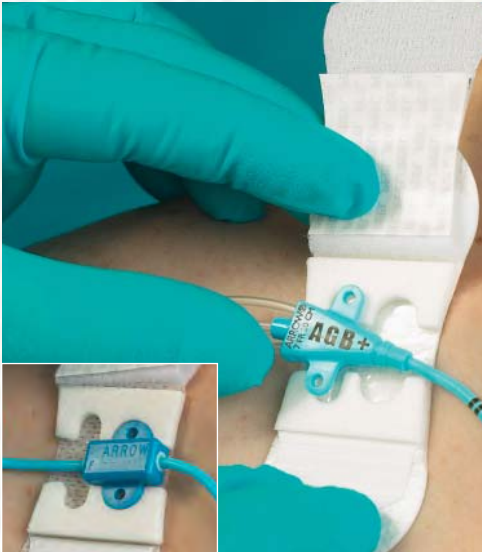

**PICC & CVC**

Grip-Lok Medium Catheter Securement stabilization device provides a foam die-cut insert that matches the shape of the PICC or CVC catheter hub for proper positioning and additional horizontal securement.

**Arrow® CVC**

(**3303MCS-TA**) will secure at the hub and will also fit alternative catheter attachment points.

**Bard PICC**

(**3304MCS-BA**) will secure a variety of Bard PICC hubs.

**Medcomp®**

(**3302MCS-MC**) will secure single and multi-lumen Pro-PICC® hubs.

**Arterial Catheter**

Grip-Lok Arterial Catheter (**4200ZAB**) stabilization device provides a breathable transparent protective cover and this suture-free securement is a one-step application that makes technique standardization easy to implement.

**BD® Arterial Cannula with FloSwitch®**

Grip-Lok Medium Catheter Securement for the BD Arterial Cannula with FloSwitch (**3301MCS-BD**) is a stabilization device that provides a die-cut adhesive area that matches the shape of the arterial cannula hub for proper positioning and additional horizontal securement.

*The 3301MCS-BD is not available in North America.*

**Epidural Catheter**

Grip-Lok Medium Epidural (**3300MEPI**) is a catheter stabilization device that provides a foam insert specifically designed for securing and preventing kinking of epidural catheters. The low profile of the 3300MEPI is designed for maximum patient comfort.

**Small Hydrocolloid**

Grip-Lok Small Hydrocolloid (**3200SH**) universal stabilization device is capable of securing tubes and lines made from silicone and other materials ranging from 1.5 to 4.5 mm in diameter. The hydrocolloid adhesive is a water soluble pectin based adhesive that is designed to be very gentle on the fragile skin of neonatal and elderly patients.

**Extra Small Hydrocolloid**

Grip-Lok Extra Small Hydrocolloid (**3100ESH**) universal stabilization device is capable of securing tubes and lines ranging from 1 - 3 mm in diameter. The 3100ESH is able to secure lines and tubes made from silicone and other plastic compounds, something even tape cannot do.

**Nasal Gastric Hydrocolloid**

Grip-Lok Nasal Gastric Hydrocolloid (**2100NGH**) provides firm securement of feeding tubes including silicone materials and will fit tube sizes ranging from 1-3 mm in diameter. With a very small footprint the 2100NGH is designed to provide securement on the smallest of patients.

*The 2100NGH can be cut in half for the very smallest of patients.*
